

# IVC-100G

## 4-Channel Video Capture Card with GPIO Module

### IVC-100G

Fullfill your basic need for surveillance

By adopting IVC-100G, you can save your money for baseline quality of surveillance video about 30 frames per second maximally shared by four channels.

### Features:

#### Pain-free extension for multi-card system:

When starting out with a DVR system, it can be surprising just what level of growth your surveillance system will reach. By choosing the IVC-100G, you can expand your surveillance area with no extra reconfiguration of your DVR system. As long as you have a free extension slot for accommodating new cards, you can easily add more "eyes" watching wherever you most need them.

#### Smart ID number for easy system maintenance:

With an LED attached to each IVC-100G, you can assign a unique number to each card in your DVR system with which to associate the surveillance area. Should something go wrong in a specific area, you can easily check out the system and replace it with a new card.

#### Linux Application Development Support

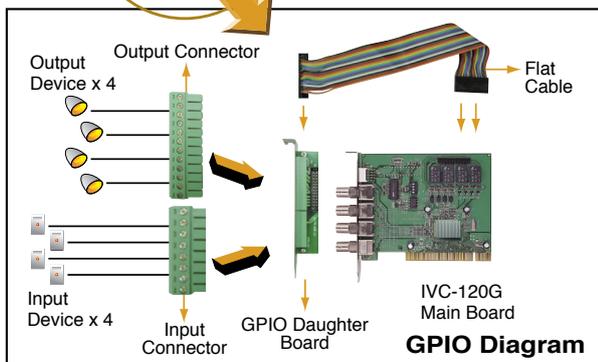

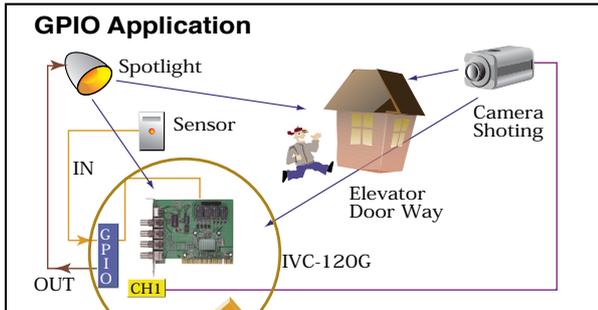

By offering system integrators a Linux driver and SDK, IEI has established a foundation for customers to develop competitive applications both quickly and cost-effectively.

#### General Purpose Input Output (GPIO):(Optional)

The GPIO connector allows users to connect external I/O devices such as a sensor, light, alarm, switch, etc...for any kind of external control that may be required.

#### GPIO Application

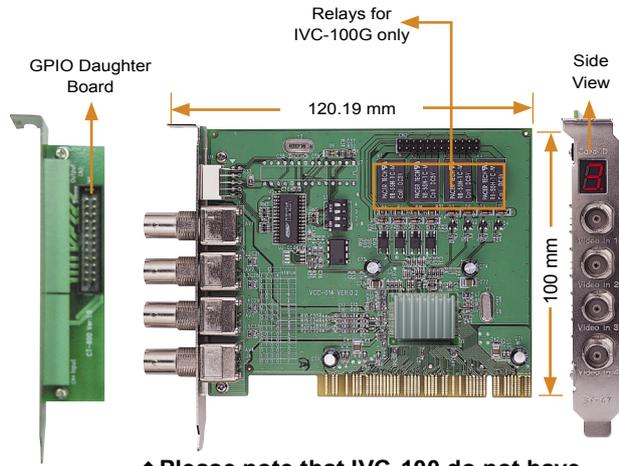

For example, you can control the spotlight over a doorway at nighttime via the GPIO connection whenever the motion detector has been triggered. Then you don't have to worry about the recording quality when someone intrude the surveillance area at night time.

The connection points of each output device are common, normal open (NO), normal closed (NC).  
The connection points of each input device are input voltage and ground.

#### Ordering Information

IVC-100 :4 channels video capture card (30 FPS)  
IVC-100G :4 channels video capture card (30 FPS) with GPIO module

- ◆ Please note that IVC-100 do not have GPIO module and have no relay on board
- ◆ Linux driver for Red Hat 7.2, 7.3, 8.0

### Technical Specification - IVC-100G

#### Hardware

- Function
  - PCI Single Universal Board
  - Plug and Play, 4 channel video capture card
- Analog Video Capture Engine
  - Conexant Fusion™ 878A x 1
  - NTSC/PAL/SECAM Video Decoding
- Support Video Loss Detection
- Multi-screen support
- Support resolution adjustment
- Support image brightness, contrast, and saturation adjustment
- LED for card ID configuration and identification

#### Input/Output Interface

- Video Inputs (x4) BNC Connector
- GPIO Module 4 inputs & 4 outputs

#### Functionality Support

- Multiple Video Resolutions
  - NTSC: 720x480, 704x480, 640x480, 352x240, 320x240, 176x112
  - PAL: 720x576, 704x576, 640x576, 352x288, 320x288, 176x144
- Capture Frame Rate
  - Max 30 FPS for 4 channels

#### Software Support

- Provide WDM driver and SDK for developer

#### Supporting OS

- Window 98 SE, ME, 2000, XP, Linux

#### Others

- Power Consumption: 3.5W@5V
- Operating Temperature: 0~ 50°C
- Board Size: 120.19mm x 100mm

#### GPIO Module (Optional)

- General Items
  - 4 relay on IVC-100G PCI board
  - A GPIO daughter board
  - An GPIO output connector (12 pin-out male connector)
  - An GPIO input connector (8 pin-out male connector)
- General Input Specification
  - Input 5VDC
    - Logic 0: 0.5V Max
    - Logic 1: 4.5V Min
  - Input 12VDC
    - Logic 0: 0.5V Max
    - Logic 1: 11V Min
- Relay Coil Specification (At 20°C)
- Relay Contact Rating

Relay Contact Rating	1 FORM C (SPDT)
Contact Capacity	Coil = 0.36W
Resistive Load (cosφ = 1)	1A/125VAC;
Inductive Load (cosφ = 0.4, L/R = 7ms)	2A/24VDC
Rate Carrying Current	0.3A/30VDC
Max. allowable voltage	2A
Max. allowable current	AC 120V;
Max. allowable power	DC 60V
Contact Material	48W
	Ag Alloy

Coil Voltage	Normal Voltage (VDC)	Normal Current (mA)	Coil Resistance (ohm 10%)
5V	5V	66.7	75
Power Consumption (W)	Pull-in Voltage (VDC)	Drop-out Voltage (VDC)	Max Allowable Voltage (VDC)
About 0.36W	75% max 3.75V	10% min 0.5V	110% 5.5V
